

KOTHA USHA

Hyderabad, Telangana

kothausha04@gmail.com — +91 99633 31365 — LinkedIn — GitHub

Education

Integrated M.Tech , Software Engineering Vellore Institute of Technology – AP, Amaravati	2022 – 2027(expected) CGPA: 9.18
Intermediate (Class XII) Sri Chaitanya Junior College, Hyderabad	2020 – 2022 Percentage: 97.1%
Secondary School (Class X) SPR School of Excellence, Kamareddy	2019 – 2020 CGPA: 10

Technical Skills

- **Programming Languages:** Java
- **Core CS Fundamentals:** Object-Oriented Programming (OOP) in Java ,Computer Networks,Operating Systems
- **Web Technologies:** HTML, CSS, JavaScript (Basics)
- **Databases:** MySQL
- **Tools and Methodologies:** Git & Agile Methodologies
- **Soft Skills:** Communication Skills, Task Prioritization, Technical Documentation,Adaptability & Quick Learning

Projects

Multimodal AI-Driven Interview Simulator GitHub

- Developed an AI-powered interview platform using **React.js** and **Google Gemini AI** for real-time answer evaluation and feedback.
- Implemented secure authentication with **Clerk** and managed user data using **Firebase** real-time database.
- Built custom interview workflows with AI-driven question analysis and **text-to-speech (TTS)** feedback.
- Designed a responsive UI using **TailwindCSS** and **Shadcn UI** for enhanced user experience.

Freelancer-Client Project Management GitHub

- Developed a full-stack web application using **React.js** (frontend) and **Node.js** (backend) to manage freelancers, clients, and project workflows on a single platform.
- Implemented backend functionality using **Node.js** to handle data storage, API requests, and efficient management of project and client information.
- Created responsive and interactive user interfaces using **HTML**, **CSS**, and **React.js** to improve user experience and simplify project tracking.

Automation Billing System (Patent Registered) GitHub

- Designed and developed an automated billing system using **ESP32-CAM** and a **Python**-based backend to enable real-time product detection and reduce manual checkout processes.
- Implemented **computer vision** techniques for image acquisition and product recognition, integrating detection results with billing logic for seamless invoice generation.
- Built an end-to-end automated pipeline for capturing product images, processing them, and generating bills with minimal human intervention.
- Achieved **98% accuracy** in product recognition and reduced overall billing cycle time by **30%**, improving efficiency and user experience.

Certifications

- Design Patent Certificate – Government of India (Patent granted)
- Machine Learning using R Programming – Infosys Springboard
